PROFESSIONAL SUMMARY

Computer Science & Engineering student at Shri Ram Institute of Technology with a strong foundation in full-stack engineering, applied artificial intelligence, and decentralized systems. Experienced in architecting end-to-end cryptographic protocols, machine learning prediction engines, and high-concurrency real-time socket communications across Web, Desktop, and Android ecosystems.

TECHNICAL SKILLS

- Languages:** C++, Python, JavaScript (ES6+), SQL, HTML5, CSS3
- Backend & Web3:** Node.js, Web3.js, RESTful APIs, WebSocket Architecture, OOP
- Databases & Cache:** PostgreSQL, MySQL, Supabase, Redis, MongoDB
- Tools & DevOps:** Git, GitHub, Docker, VS Code, Jupyter Notebook, Linux
- Core Specializations:** Full-Stack Development, Applied AI & Predictive Analytics, Blockchain Security, Windows Desktop Apps

ENGINEERED PROJECTS

Aegis Secure System Node.js Web3.js Blockchain Security Live Demo ↗

- Engineered an end-to-end encrypted communication interface leveraging **Node.js** and **Web3.js** for decentralized cryptographic validation.
- Implemented blockchain verification principles to guarantee message immutability and eliminate single points of compromise.
- Integrated automated heuristic inspections to safeguard payloads against unauthorized tampering and malicious injection vectors.

Dhanvaanijya Python MongoDB Applied ML Live Demo ↗

- Constructed an intelligent stock analytics platform utilizing **Python** and **MongoDB** for high-throughput time-series data storage.
- Integrated predictive machine learning models to generate individual user risk indices and forward-looking price trajectory forecasts.
- Architected interactive community forums with real-time sentiment scoring to evaluate prevailing crowd market bias.

Commune-X Node.js Redis WebSockets Live Demo ↗

- Developed a cross-platform anonymous communication network deployed natively across **Web, Windows desktop, and Android**.
- Optimized socket connections using **Redis** for stateful session persistence and sub-second message propagation.
- Embedded automated AI content-moderation routines to detect and filter abusive phrase patterns and traffic anomalies in real time.

EDUCATION

Shri Ram Institute of Technology — Jabalpur, MP Expected Graduation: 2027
Bachelor of Technology (B.Tech) in Computer Science & Engineering **SGPA: 7.83** | **CGPA: 6.58**
